Both Days Are Legal Holidays

To clear up any confusion on the point, the Herald can authoritatively announce that Thanksgiving Day will be observed on October 9 and Armistice Day on November 11 and each will be a separate public statutory holiday.

While Armistice Day is a fixed holiday on November 11, Thanksgiving, from year to year, is now fixed by order-in-council. It is usually planned, however, to be, as this year, on the second Monday of October. —Leth. Herald.

REWARD

\$50.00 reward will be paid for information leading to the arrest or conviction of the party or parties who took the rims, tubes and tires from Model T Ford Truck at my farm September 12th or 13th. The tires are 30x5 Heavy Duty Diamond Tread Goodyears in good order. Can identify if I see them.
G. F. SMITH,
Box 45, Champion.

Card of Thanks

We wish to express our sincere thanks for the beautiful flowers and gifts which were sent to Jenn during her recent illness, also the friends and neighbors for their kind inquiries.

Mr. and Mrs. Oscar Hagg
and Miss Jean

Threshing operations in this district are practically complete, with just the odd field left for combining. Yields have averaged from 9 to 18 bushels on summerfallow and 3 to 7 on stubble. Grain before rains was grading No. 1 Northern and had good weight but since the rains it has been considerably bleached with loss in weight. Recent rains have resulted in considerable green feed and it is the hope of all farmers that they will be spared a frost until the feed is ready for cutting.

Local & General

R. I. Baker has been on the sick list this week.
Furs Wool Jumbo Kait Sweaters wonderful value at Campbell's.

Mrs. Vanbesen left Wednesday for Vancouver.

Mr. and Mrs. Frank Freeze of Calgary, were Champion visitors Sunday.

Mr. and Mrs. O. B. Smith were Lethbridge visitors Tuesday.

1,000 lbs. of Lard on sale at the Meat Market this week end.
Mrs. Clara Ashmore and Jim Ashmore were Lethbridge visitors on Saturday.

Wednesday half holidays will commence September 27.

Hyalg Crab, Flemish Beauty Pears, Doc's Walt, see Campbell.

Mr. and Mrs. Harry Smith were Lethbridge visitors this week.

Special Sale of Lard at the Meat Market this week end.

Mike Beingsesser and Joe Path left for Wetaskiwin this week.

The Catholic Women's League will hold a Bake Sale at Farmer's Hardware on Saturday, September 23.

Miss Mabel McPherson and Miss Mary Cook attended the Rebekahs lodge held in Vulcan on Monday evening.

Miss Elsie Schmelke was operated on for appendicitis in the Vulcan hospital this week and is progressing nicely.

Miss James of Lethbridge has accepted the position as operator in the local telephone exchange.

Men! The sweetest buy you ever made. All Wool Pullovers, Special \$6 each at Campbell's.

Mrs. Pritchard of Calgary was a guest at the home of her brothers, Ed and Henry Seland this week.

Last call for peaches and prunes Fruit Right, prices right at Campbell's.

"EYES EXAMINED" at Champion Hotel, Tuesday afternoon, September 26. E. J. Anderson, B. So., J. E. Thomas, (associate).

Germany Helpless If Attacked From Air

Country Lacks Necessary Defense
Opinion Of Minister Of Aviation

As long as the nations of the world disregard the principle that bombing 'planes must be used as a deterrent to grant Germany at least a maximum air defense force, it is ridiculous to speak of disarmament.

This is the attitude of the Hitler government as expressed by Herrmann Goering, Minister of Aviation, in an exclusive interview.

In speaking of aviation, military or civil, Goering obviously dealt with a subject close to his heart.

In vibrant sentences, Goering declared that he would "ceaselessly protest against the false impression" against the outright loss of Germany's army and navy provide her adequate defense.

"These two branches," he said, "offer only a horizontal defense on land and water. The vertical defense—that is, upward in the air—is completely lacking."

"Whatever power wants to attack Germany need only close the frontiers and then send bombing 'planes against which we have no defense. The absence of a vertical defense utterly neutralizes the possession of horizontal defenses. On water, one has to meet attack with water and on land with land forces; in the air, one needs 'planes."

"Germany today," continues Goering, "has only a civil aviation service, but it is an excellent one. My program is to keep this force efficient, to maintain a 100 per cent. integrity and promptness of traffic."

We are planning to concentrate development on the adoption of multi-motored 'planes to remove the danger of accident, always present in a single-motored machine. We are also conducting constant research in blind flying, and in special means of combating the sting of a 'plane's wings."

Improvised Trucks Dangerous

Too Top-Heavy When Used For
Conveying Passengers

Danger of permitting trucks to be used as passenger-carrying vehicles on the highways has once more been exemplified. One boy among a party of twenty was killed and several others were critically injured in a collision near Guthrie when they were thrown from boxes on which they were sitting on the platform of their improvised conveyance, the rack of which was ripped off. The driver of the motor car with which they collided escaped with minor injuries.

This accident is one of a number of similar character relating to the danger of permitting trucks to be used as passenger-carrying vehicles. The situation is one that the Department of Highways cannot continue to ignore. Use of the platform of a commercial vehicle for passengers creates a swaying, top-heavy load for which trucks are not designed. There is little protection and no safety in case of an upset and the chances of the occupants escaping unhurt in the event of an accident are remote.

Hundreds of these makeshift vehicles are in use every summer on the roads of Ontario. Usually they are overcrowded. It would be a waste of time, in the interests of public safety, that regulations were formulated and put into effect to prevent their use or provide safeguards. Action in this respect should not be long delayed.—Toronto Telegram.

Paris Adopts American Habits

Cafe Proprietors Have Put "Hot Dog"

On Their Menu
That American delicacy, the hot dog, has been revived by every gourmet and chef that has come to Paris from across the water. Now comes news that the cafe proprietors of Paris have started a campaign to add La Belle France to the hot dog plain. Sausages of Frankfurt, they have been called in the past, but now plain "hot dog" is the new term and signs in cafes advertise them at 2 fr. 50 the pair.

A French manufacturer reported that his output of the sausages had increased from 100,000 to 250,000 daily as a result of the propaganda.

The humble, ubiquitous American hot dog bids fair to become a new link, or several new links, in international understanding and unity.—New York World-Telegram.

Boggs—"In the happy man on earth I've got the best wife in the country."

Moggs—"Pah! Who wouldn't be happy with his wife in the country?"

If nothing succeeds like success, likewise nothing fails like failure.

Becoming Great Industry

Cellophane Now Being Made In
Many Useful Articles

One of the romances of modern science and industry is the discovery and development of cellophane. Lately, cellophane was quite an accidental discovery, stumbled upon while trying to discover something else.

During the past few years cellophane has grown from novelty to a commonplace. Today, it has a multitude of uses and new ones are being added. The man who wears a shirt, or the woman who buys a packet of fruit or a pound of sausages, finds the purchase wrapped in clean, sanitary cellophane.

The new universal wrapper did not burst suddenly upon the world. "Mortimer" silk and then rayon were the grandparents of cellophane. Cellophane had its beginnings when a Swiss chemist named Brandenberger sought to give a cellulose sheet a cotton print goods. He did, but it was so stiff that a woman could not sit down with a dress on. He kept experimenting until he produced a thin, filmy substance which was still too soft for dress purposes. What to do with it he did not know. He began to have an unwanted baby on his hands. He continued working at it until it became the transparent but tough stuff that it is today. He had invented what is now known as cellophane.

The industry looked askance at the new product. They did not see what place there was for it in the scheme of things. For it was dead then. It was only when it came to the attention of a certain Dr. C. J. Brown, who had a patent for it, that it was valued at \$2.65 a pound. To wrap a loaf of meat would have added two cents to the cost of bread.

Other brains got to work and gradually cellophane was made better and cheaper. Cellophane was first put on the market only as a wrapping for hot candy. Then it was rapidly widened and widened, until now almost everything is wrapped in cellophane. The latest attractiveness of the package has increased sales and been a real help to business. Now it is being made into parasols, colored ribbons, lamp shades, bolts, wall-paper, neckties, braces and many other things. Experts are being trained to make cellophane. The industry is growing rapidly.

Thousands of acres of spruce trees are being cut every year to make cellophane. And the industry is studying more test tubes.—St. Thomas Times-Journal.

Usurping Place Of Spinach

Scientific Information Given On Food
Value Of Oyster

The oyster, a tiny little shell animal, is usurping claims which have been made by spinach. Arguments are being made by the oyster growers of the United States that it is to be interpreted correctly.

"Nameless, oysters are 'good for you'."

Scientific and expert information on the food value of the bivalve was imparted at New York to delegates to the Oyster Growers and Dealers' Association of North America, convention by Howard W. Beach, president of the association. Dr. Werner Bergman of Yale University and Dr. Dorothy W. Whipple, Children's Hospital, University of Pennsylvania.

"Science will eventually put the oyster in its proper place as a most valuable food," Dr. Bergman said, "because, being one of the very few animals which is eaten in raw life form, unaffected by heat and air, it may be expected to have its full repertoire of vitamins and hormones."

Dr. Whipple found that vitamins "A" and "B" are not alone present in raw oysters, but that they lose potency only slightly in the cooking process. Vitamin "A" is the vitamin supporting vitality, and vitamin "B" is the one preventing nervous derangements and tending to promote growth and appetite.

Investigators for the association also claim that the oyster is rich in iron, and that it is a good source of calcium.

Had Reason For Reserve
Must have been said of the modesty and reticence of the Wright brothers of airplane fame. That they were able to give a clever reason for their reserve is indicated by the story.

"You see," said the financial agent of the two Dayton skyfliers, the Wrights are what you might call too Wilbur, and too modest. I say so once to Wilbur, and do you know what he answered?" Mr. Flint paused long enough to chuckle.

"Wilbur said to me, 'Mr. Flint, the best talker and the worst liar among the birds is the parrot.'"

Green gold is generally an alloy of gold and silver.

Fight Sleeping Sickness

United States Medical Forces Making
Intensive Study

U.S. Medical Science is marshalling its forces for a concentrated attack on the problem of "sleeping sickness," a disease which is determined by the method by which it has apparently been transmitted from one person to another in the St. Louis area where it has been found.

Aided by numerous rabbits, a dozen monkeys and 10,000 adult mosquitoes, army medical experts took over the task of determining whether the disease is transmitted by insects. Attempts to transmit the disease from human victims through the medium of the insects were in the process.

Major James A. Simmons said he was taking a "long shot" in an attempt to link the study of encephalitis with previous army investigations of "equine encephalomyelitis and herpes-neuritis."

Meanwhile, reports of isolated cases of "sleeping sickness" came from widely separated sections of the United States. The Minnesota state health department reported there had been 20 deaths out of 28 cases since Jan. 1, with four scattered cases in the state.

Dr. J. Chesley, state health officer, however, said the situation was no worse, than in any other year since 1910, when the first case came to the health department's attention.

Home Preserves

Proper Storage Is A Very Important
Matter In Preserving Fruit

In the successful home preservation of fruits and vegetables, the matter of proper storage is important. A cool, dark place is ideal because heat favors the growth of bacteria, light causes fading, while dampness further encourages the growth of mold and may even cause rust on the metal fastenings of jars. Canned goods, says the Dominion Department of Agriculture in its latest bulletin on preserving fruit in the home, should not be allowed to lie about under uncertain conditions. The jars should be labeled with the name of the product and date when canned. If dark storage is not available, the jars should be wrapped in paper to exclude light. Again, if a damp atmosphere is positively unavoidable, the rubbers on the jars should be examined from time to time, as mould may attack them, making possible the admission of air and bacteria to the contents of the jar.

Accidents Made Church Favors

London Has Church Where Even
Murder Was Committed

St. Mary's Church in London, whose restored bells were dedicated recently by the Archbishop of Canterbury after a silence of six years, is becoming famous through accidents which occurred to the original church building. Years ago the roof was blown off, at another time the steeple fell and killed several people, and later the building was "burned" because a murderer committed in it. The eve of the fall of the church was once a signal for lovers to close for the night. The old bells which Dick Whittington is said to have heard were destroyed by the Great Fire.

Appeals To Some

Planting less what acreage and working but thirty hours a week is a policy of "do less," which does not appeal to the logic of human nature. It may find favor with the man who just naturally "likes to work."

Even the most intelligent man will, if he is wise, kneel—in a casket.

Home For Discarded Pets

London Zoo Has Many Even In
Reptile House

From time to time there arrives at the Zoo a tame animal and birds of the sort which private owners wish to dispose. The parrot house, says a writer in Pearson's Weekly, has several; so has the monkey house; and, strange as it may seem, there are some even in the reptile house!

Naturally, the great majority of these discarded pets are monkeys. There are always plenty of folk ready to buy a monkey as a novelty. They get one from some animal dealer, and for a short time they are charmed with it. Then the novelty wears off, as it is a very apt to do when the real monkey-nature asserts itself, resulting in torn clothing, scratched furniture, broken crockery, and so on.

Confronted at last with the problem of getting rid of the pet, the owner generally ends by offering it to the Zoo.

Parrots are presented usually because the owner is going abroad, and has died—parrots live a long time and, frequently outlive their owners. But sometimes the language problem is at the root of the trouble. Some are remarkably the African greys—and are sent to the Zoo because of the phrase of the not-to-polite order, and once learnt they find it hard to forget them.

Among the discarded pets in the reptile house is an Indian python which belonged to a lady who had tamed it herself, and had got it in her possession for over ten years. Fortunately, she had to go into hospital for a lengthy period, and, since no one could be found willing to take the pet, she was forced to bring it to the Zoo to be kept, and there lives, behind a glass screen.

Friendliness In Business

Cheerful Atmosphere Goes Long Way
Toward Attracting Customers

"Service with a smile" may have been overdone as a slogan in some cases, but it's a mighty good one just the same. A smile is a language of cheer and cheeriness and wholesome personal from the president to office boy is friendly, accommodating, optimistic, is the one thing which can win out, especially when general business conditions are not up to the mark and something more than ordinary merchandising is demanded.

We have never been able to understand of course, why all businesses should be run in this way. It's much easier and much more pleasant to be cheerful and friendly than to take the opposite attitude. A smile is a language and usually means a lot. A cheerful, accommodating atmosphere is invaluable in practically every line of business. Why don't more people cultivate it?—Border Cities Star.

Napoleon On Financiers

Napoleon's opinion on financiers is quoted by Hervey Allen in a book entitled "Anthony Adverse," as follows: "The hundred that are 'ifs' do not stop them, they will own Europe—the world. Financiers cannot act. They never do anything. They are passive, they spin web, and every wind, blow, place, blow war, brings them flies. They are not the fit repositories for power."—U. F. A. Calgary.

Venice Has Large Garage

At the Venice end of the new bridge connecting the Italian island city to the mainland has been erected the largest garage in Europe. It has a capacity of 2,000 cars. There is no room for automobiles to run in Venice, because of the narrow streets.

Challenge To Medical Men

Strange Case At Toronto Will Mean
Greater Research

Miss Jean Wilson, well-known as the best speed skater Canada has yet produced, died in Toronto. For a year she has been in a hospital, and before that she was receiving medical treatment. She was attacked by a strange malady which had the effect of paralyzing the muscular system, and finally it attacked the muscles of her lungs, breathing was no longer possible.

What was the disease? The doctors do not know. It was said that within the last week of her illness fully two hundred doctors and specialists witnessed the case, but they could do nothing about it because they did not understand the nature of the trouble nor its cause.

From accounts published in Toronto papers it appears certain that at no time did Miss Wilson lack anything in the way of attention or care, and it seems certain that everything which scientific care could produce was brought to her assistance, not without avail.

What challenge there is in such a case. When two hundred of the medical fraternity stand beside the bed where a young lady is fast slipping away, and admit that they do not know the cause of the trouble, there is a call for a doubling of effort and a greater advance into the field of medicine and investigation. Having to stand helpless in the face of such a case is insufficient to drive good men to efforts hitherto undreamed of.—Stratford Beacon-Herald.

Proves Greed Does Not Pay

New French Dock Idle Because
Charges Too High

The port of Cherbourg, in France, has a new dock development costing \$12,500,000, but so far not a single liner has tied to the wharves. Instead, the giant ocean vessels continue to anchor in the basin and use tugs to land or take on passengers and cargo.

Officially opened on July 30 by the French minister of marine, the docks were supposed to attract the cream of the ocean trade. But it costs 30,000 francs to tie up at the wharves, while a tugboat can land 100 passengers for 6,000 francs per 200 passengers. As 400 passengers is the average load for an ocean vessel to embark or disembark at Cherbourg, the big saving to the steamship companies is readily seen.

Cherbourg is the usual French port for the big boats plying an ocean ferry service between New York and Southampton or Bremen or Hamburg. In the hope of making it more popular and bringing more traffic to France, the port authorities of Cherbourg went ahead with the dock development.

They then spoiled their efforts by levying too high charges. When the boats come down the coast, they will lose money. People prefer to steer from the ship to dry land. Tendering is not pleasant, especially if it is raining.—Border Cities Star.

Has Fine Bird Collection

Nova Scotia Railway Agent Ovas
Over 300 Specimens

Peter La France, railway agent at Chester, Nova Scotia, is credited with having the best private collection of birds and animals in Canada.

Mr. La France, who is an amateur taxidermist, has over 300 specimens, from humming bird to eagle. About five years ago, the provincial government, borrowed game birds from him. For the sporting exhibition in London 1911 his first collection of birds won the prize at the Halifax Exhibition.

World's Greatest Famine

Listening to wireless is still the world's greatest famine. The report of the International Breadbasket shows that there are 40,000,000 receiving stars in the world; the majority in the United States where there are 100 receivers per 1,000 inhabitants. It is estimated 160,000,000 people listen in on the 40,000,000 receiving stars.

Safest Form Of Travel

There was only one passenger killed on the new 3,000,000 carried on Canadian railways last year, according to the Dominion Bureau of Statistics. Obviously patronage of the railways is not determined by the attractions of safety.

Minister (calling)—"And what does your mother do for you when you've been a good girl?"

Margery—"She lets me stay home from school."

"Why don't you advertise?"

"Look here! I know my business."—"Sure! But how about letting other people know about it?"

Experts can transplant trees 50 feet tall to new homes.

Saskatchewan is the world's greatest wheat growing province.

Blames Jap Intrigue

Dr. T. V. Scott, Chinese Finance Minister, disputes the charge that Japan has been interfering in North China because there is no central or authoritative government there. In an interview with the New York Times, he said: "The governmental situation in China is far from chaotic except where Jap intrigue or invasion or intrigue has made it so."

It is reported that an enamel made of rubber is being developed as a protective coating for the under side of airplane wings.

Professor Drummond Sees No Chance Of Making Profit From Canada's Basic Industry

"Any person who looks for a profit from farming in 1933 should have his head examined," Prof. W. M. Drummond, of the University of Toronto, declared at the Liberal-Conservative summer school at Newmarket, Ont.

"There has been so much said since 1922 about the fundamental importance of a prosperous agriculture in this country, of the absolute impossibility of anybody in Canada being prosperous without Canada's farmers being prosperous that one would have thought the major interest of reformers with any materialistic ambition would have turned towards the formulation of a policy calculated to guarantee the utmost in the way of a prosperous agriculture," he went on.

"The fact that such has not been the case leads us to the conclusion that most of the statements concerning the great importance of agriculture in our national life have never intended to be taken seriously."

The reformer who would improve the farmer's lot was almost certain to throw up his hands in despair after really looking at the task in hand, Professor Drummond said.

The very nature of farming precludes curtailment of production to meet a falling market, he asserted. The farmer, in his bargaining counter, was usually in the position of the non-union laborer seeking work from an employer of many thousands of men.

While prices might drop, he said, some costs usually remained at the same old level. A correspondingly large portion of the income has to go to the covering of fixed costs, while at the same time falling prices stimulated the farmer to produce more in order to attempt to cover his costs.

The profession of the farmer, Prof. Drummond held, was as dignified as any necessary. Much of the farmer's trouble could be traced to the opinion held by many city dwellers that the man of the soil was not any too busy.

"It must be so that the stigma is removed and that the farmer himself is equipped with a proper pride in his work. Unless we do we are only admitting indirectly when we talk about an intelligent and prosperous agriculture population."

A Wonderful Record

Cow At Woodstock, Ontario, Aclaimed As Greatest Holder Of Record At Woodstock, Ont., is a cow named Springbank Snow Countess which is acclaimed as the greatest holder on record. She is 14 years old, and, indeed, awe inspiring. During her lifetime this cow has produced 9,977 pounds of butter, approximately 200 cubic feet. Molded into conventional bricks this would make a line three quarters of a mile long, or a wall five feet high and nearly 80 feet long. It is enough butter to spread on 691,200 slices of bread, making the generous allowance of half a cube inch to a slice. That many slices could be made of two entire football fields, including end zones, and there would be enough left over to cover two-thirds of another field. It would pave ten 300-foot blocks of a street 38 feet wide. The milk this cow yearly produces is enough to supply more than a score of children with a quart every day.

It is truly a wonderful cow.—Detroit Free Press.

According To Calculation

Normal Man At 70 Has Fatness 700 Times His Weight.

A healthy man, with a normal appetite, who reaches 70 has eaten 700 times his own weight, according to the calculation of experts of the Faculty of Paris. They have figured that in his span of seventy years the average man of 140 pounds would have eaten thirteen tons of bread, fifteen tons of vegetables, seven tons of meat or thirteen whole cows, seven tons of fruit, 1,600 pounds of candy and sugar, drunk 15,000 quarts of milk and 20,000 quarts of beer in Europe, or water in America.

Restaurant Patron: "Waiter, do you call this an oyster stew?" the oyster in this stew isn't big enough to flavor it."

Waiter: "Well, sir, that oyster was not put in to flavor it, sir. It's supposed to chastise it."

Nearly twice as many bananas are being shipped from Guadeloupe, French West Indies, as a year ago.

INTEREST IN WIDENED SHOULDER LINE RESULTS IN DOLLAR PUTTING SLEEVES

Develop this modish youthful dress in one of the new shades of soft, crinkly crepe silk and you will love it. Grey, beige, Eleanor blue, and, being extremely popular. And while it looks lovely in plain crepe it also looks exceedingly well in silk crepe of very small prints. For instance, a brown and white scheme giving the effect of a checked pattern, with a brown leather (or self-material) belt can be worn. Make the gump of plain white crepe.

Style No. 730 is designed in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 2 1/2 yards 35-inch with 1 1/2 yards 35-inch for blouse. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

FIRST TIGER CUBS BORN IN ENGLAND IN FIFTY YEARS

Our picture shows three tiger cubs born at Whipsnade Zoo, in England, on view for the first time. Now seven weeks old, these playful little lumps of striped wood are the first to be born and continue to live in England, in captivity, for fifty years. The mother is giving one of the cubs a wash-and-brush with her substantial tongue.

Learn Efficiency From West

Chinese Women Are Rapidly Advancing In Public Life

Speaking on "The Changing Woman in the Changing China," at the Women's Educational Club, Toronto, Dr. Wu, head of Glining College, China, astonished her audience by outlining the rapid advance of Chinese women in public life. Dr. Wu spoke of how such women must face the future. "We have the rich heritage which has taught women, through its culture and the patriarchal system, self-control, poise and the ability to handle men. We are learning efficiency from the west. It remains for us to prove our worth that we have opportunity."

Chinese women in medicine, nursing, education, politics, journalism, and even law were listed in large numbers. And this sensational change in attitude was noted: In years past women's voices were not supposed to be heard outside the home courtyard. In recent months Government talking pictures had been taken of the girl students in songs and first-hand practice at Glining College to be shown for the recreation of soldiers at the front. Thus women's voice, once almost unheard in the home courtyard, was heard even over the firing line.

Equality in inheritance and marriage rights were noted. Dr. Wu referred to the young woman who was virtually director of the research department of a great bank, and to another who, after years of employment in a bank, started a bank of her own which had six millions of deposits.

Dr. Wu made it clear, however, that China was a country so big that no description of women's advancing status held for every part. In the case of the educated women had taken advantage of the changes. Tribute was paid by the speaker to western missions for their work in first opening education to women in China.

New Store For Churchill

Hudson's Bay Company Will Be Ready For Business Soon

Work has been started on the new retail store of the Hudson's Bay Company, at Churchill, which is being constructed at the corner of Hudson Square and Kelsey Boulevard, on the new townsite plan.

The building will be a two-story structure 30 by 50 feet. It provides for a store, warehouse and quarters above for the staff.

The store is the third to be constructed on the new townsite. At present, the company has a warehouse about one mile from the townsite, and a trading post in old Fort Churchill, on the west side of the river.

The first trading post of the Hudson's Bay Company in Churchill was established shortly after the company was founded and preliminary surveys for trading posts were made in the sub-Arctic in 1668.

At present, the company has a warehouse about one mile from the townsite, and a trading post in old Fort Churchill, on the west side of the river.

Newspapers On Cruise's Island

Robinson Crusoe, if he lived today, wouldn't have to look for footprints in the sand to learn of visitors to his island. He'd just glance through the morning edition of the Tobago Times.

In Tobago, the island indicated as the scene of Defoe's immortal story, now has the first newspaper in its history.

Advantages Of Rural Life Offer Attractions To The Town Dweller In Many Ways

Scientists Study Volcanic Ash

Professor of University of Saskatchewan Completes Important Research

Professor V. G. Worcester, of the ceramic department of the University of Saskatchewan has recently completed an important piece of research on the problem of volcanic ash in the field of ceramics, according to a bulletin of the department of railways, labor and industries.

Extensive deposits of volcanic ash have been found in Saskatchewan in the Swift Current district. Other deposits are also known to exist in the Victor Mile Lake Valley near St. Victor and in the general area known as Wood Mountain.

There has been established a Swift Current plant which will produce household cleaners, abrasive products which have volcanic ash as their base material.

The work so far has proven that within certain limitations the volcanic ash is a substitute for feldspar in a number of ceramic products. It is to be mentioned that at present the discovery is likely to prove of more interest and importance to the west than to the more easterly section, where an abundant supply of feldspar is available in all commercial grades.

Excess Wheat Production

Problem Result Of Necessity For Supply During War

The problem of excess production of foodstuffs can be traced directly to the necessity of supplying the armies in the world war. World production of wheat in 1913-1914, China excluded, totaled 4,250,000 bushels. In 1923, with Russia included the output was 4,011,000 bushels. In 1923-24 a sharp reduction in the output of the United States was chiefly responsible for the lower total of 3,760,000 bushels with Russia and China excluded. Semi-failures of crops in the last two years removed Russia temporarily as an exporting factor. Meanwhile Germany, Poland, Austria, Canada, the Argentine and some of the Danubian countries have not only increased their wheat acreage, but when Russia re-enters the world markets, there is in prospect a great glut that may ruin the price structure for any agriculture group on an export basis.—Chicago Daily News.

Lower Rate For Apples

Freight Charges On Shipments From Okanagan Valley Reduced

Reduced freight rates on apple shipments from the Okanagan Valley district of British Columbia to export points recently announced by the Canadian National and Canadian Pacific railways became effective Sept. 1.

On shipments to eastern Canada the reduction is 25 cents per 100 pounds, and to stations in Ontario west of Port William and Armstrong and the provinces of Manitoba, Saskatchewan and Alberta the rate is 15 cents per 100 pounds below the former rates.

The new rate, in effect until May 31 next year, are expected to greatly assist apple growers in marketing their fruit.

Epidemic Myiases

Farmers In Trinidad

Natives Think Wrath Of Gods Causing Cattle To Die

A mysterious epidemic of cattle deaths, passing up and down the coast of Trinidad, has broken out in the neighborhood of a deserted old French village, 14 miles from Port of Spain, Trinidad.

The epidemic believed caused by blood-thirsty vampire bats, has disheartened the natives' belief in the power of incantation of cattle and the farmers are resorting to the old method of sacrifices to appease the wrath of the gods which they believe are now visiting them.

Sky A Sea Of Flames

Within four hours 3,000 flashes of lightning were counted by an official lightning autograph instrument during heavy thunderstorms in west Germany and the Dutch frontier district. The instrument was at Nordhorn, Westphalia. In one and one-half hours the instrument counted 1,000 flashes. The weather was registered. Observers said that during the four hours the sky was a sea of flames.

(Charles Downing Lay, in New York Herald-Tribune.)

Unemployment and its consequences in reduced nations always produce a longing for country life with its constant occupation on the land. Other circumstances may be therefore, explain the revival after a quarter of a century, of the back to the land cry, which seems to gain headway in spite of distress and bankruptcy in agricultural communities.

The charms of rural life is always the same; only the counter attractions of the town go up and down in value with prosperity and with depression. In any period, good or bad, a well man can always produce a good living for his family from the soil. Those who love country living are ever looking for a place where they are not to be deterred by city air and muddy boots or dusty clothing or about being chaperoned to a cow, for the know or by clever remarks of the milk come home from town, the luxury of rich cream and sweet butter.

They know too the ecstasy of spring mornings when they see the sun rise over the hills and feel the softest of the never absent welcome of the cows and horses when the stables doors are opened at feeding time. They know the joy of their own rooster crowing to the dawn and geese and turkeys when they speak of the care of animals being exacting. It is always a pleasant occupation for some people, and the companionship of the dumbest beast is something that many people who works with him. Some men (and women, too) are born stockmen or chicken or poultrymen, and would always be interested in the things they always have their work in the right way and at the right time and produce the finest fruit and the best of crops.

The two occupations of agriculture and animal husbandry cannot be separated. The stockman must raise feed for the cattle and the gardener must have a draft animal for work and for the necessary food of his family. The farmer on the farm has money that otherwise must go to manufacturers of chemicals.

What the farmer produces for his own consumption should be some gain, and he has the chance on meat from his produce to eat and to like a price if he has a good cook for a princess. Home grown milk, eggs, butter, cheese, poultry, pork, and all the good things, with vegetables, meat and fruit in abundance not forgetting a hundred other delicacies like maple sugar and honey give the farmer a life of pleasure and high living and provide the best possible reason for the city man's urge to get out of town.

If the farmer's cellar is full of apples, potatoes, celery, cabbage and other things, including barrels of wine and cider, and if his smokehouse is full of hams, bacon and shoulders, and the pantry shelves are sagging with home-made jellies and preserves in glass, why should he laugh out loud at the sight of the city man going to the delicatessen for a half-dozen cans of beans or half a roast chicken (and a leghorn at that) and two oranges?

Farm life may always be popular with people who like to live well, and so long as the farm table grows it will be doubly attractive in a depression.

Women Make Farm Pay

Melior And Four Daughters Learn To Do Man's Work

Undaunted by the supposed indications of Mrs. P. J. Jones and her four daughters on rate an eighty-four-acre farm near Latham, Ont.

The four daughters, Viola, Georgia, Marion and Gretchen, know 1150 about farm work when their father died three years ago, but, as was a boy's family the girls learned the hard way and went to work.

They have learned to do successfully all the farm work usually performed by men and the farm has been profitable even during the lean years. This year they will have good crops and the Dutch frontier district.

In addition to cultivating their fields, the girls milk eight cows, feed nine pigs, and 40 chickens a month. During the winter the two older daughters hang up their overalls and teach in neighboring schools.

Another times, when she was commanded or commanded by Mrs. I suspected that she was laughing with her at her quiescent sublimity. Did he, too, only appear to assist to Amelia to save argument and energy, because opposing her was useless as hurling one-self against stone wall?

Years later, he had been the king of the two when they had explained to her their plans for her as temporary ward. Almost, her resentment had caused her to commit some rash act when the woman who she had accepted as her mother

After the revelation of the war situation, she had gradually gathered together that series of memories and incidents, like a difficult picture puzzle. She loved her own mother with a mingled pity and resentment, for she never was able to think of Lorenz as her father. From her mother and sophisticated background, she had learned to value her own culture, she studied and analyzed it, recognizing an occasional

HELP FOR TIRED WIVES
Take Lydia E. Pinkham's
Vegetable Compound

Wives get tired during these hard times. They are the ones who must bear the brunt of the family weariness. Their husbands come home with less money for their pay envelopes... it is they who must struggle alone and make the best of things.

When they are tired... worn out... nervous, try Lydia E. Pinkham's Vegetable Compound. It will give you the strength to carry on.

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today... and watch the results.

must provide for their own expense and that of their families. In every village gas and bomb shelters must be built. The government, it was added, would build factories to make gas masks.

An electrically-driven miniature motor car intended for children's use in gardens and private grounds is being marketed in England. The portable auto has all the fittings—engine, self-starter, horn, lamps, accelerator, etc.—of a real auto.

Germany has placed a higher value on strong beer than on light beer.

table, sure. Ask for them by name. substitutes. 25c. at all druggists.

WORLD HAPPENINGS
BRIEFLY TOLD

Two military airplanes collided in the air at Kielce, Poland, killing four occupants.

T. A. Love, Grand Forks, B.C., was elected president of the British Columbia-Yukon Weekly Newspapers Association.

Robert Van Rielleghe demonstrated at Brussels, Germany, a miniature aeroplane which, he contends, is proof against fire and heat.

Brazil's new "pure coffee" law has become effective and hereafter stores can sell only coffee fresh from the roaster. Ten days old is the limit.

The world Jewish Conference closed its sessions by adopting a resolution calling for a boycott on German goods until the rights of Jews in Germany have been restored.

The radio station at Cameron Bay has been destroyed by fire, it was learned in a radio message received at Churchill. No details of the blaze were given. The cause of the fire is not known.

Ramuel Driblin, 73-year-old chief engineer of the "Noron" flagship of the Northern Navigation fleet, has seen 52 years' service on the lakes, his anniversary being held recently.

Discussion of plans for the Canadian Medical Association Convention in Calgary in June, 1934, has resulted in a decision to invite the Prince of Wales to attend as the prince's birthday, June 23, occurs during convention.

Calgary Fish and Game Association has decided to start an investigation of the disease which has killed thousands of ducks in southern Alberta this season. The heaviest toll occurred at St. Albert Lake, about 42 miles east of Calgary.

Sir Gilbert Christopher Vyle, prominent financier and engineer who acted as industrial adviser to the United Kingdom delegation at the Imperial economic conference held in Ottawa last year, died at his home in Birmingham, England. He was 62 years of age.

A Queer Voyage

Trip From England To The Black Sea

In Hand Propelled Boat

Oddest of many queer voyages attempted in recent years is the trip which two Edmonton, England, men have started with their little boat. Their collapsible boat made of a form of aluminum is operated by pedals and hand propellers. Four hands in the engine room of the boat, which weighs about a quarter of a ton. The itinerary is from Southampton, through the Bay of Biscay, past Gibraltar and into the Mediterranean, then along the northern African coast and so on. Varna is the destination of the boat, but a call will be made at Constantinople, and the return will be by way of the European coast of the Mediterranean.

Scientists Are Puzzled

Have No Theory About Weird Noises Over Yellowstone Lake

Yellowstone Park Yellowstone Park geologists and scientists are still pondering, after 50 years of mystery, over the strange sounds heard over Yellowstone Lake every morning in the late summer. The weird inexpressible noises begin like the muffled sounds of birds in flight with whirring, flapping wings, rise quickly in crescendo and end as a sustained note with distinct rhythmic quality.

All theories so far offered for the phenomenon have been dispelled by observations.

Germany's Floating Airport

Anchored In Southern Atlantic And Is Fully Equipped

The "German ex-lander" "Westfalia" has been taken from Cuxhaven, Germany, to the Southern Atlantic, where it is anchored between South America and Africa as a landing place for German passenger planes to South America. It recently carried out trial trips near Kiel. The "Westfalia" will be a complete floating airport, with equipment for refueling and repairs. It has a canvas landing stage on which a plane may taxi, and take off will be by catapult.

Mutual Interests

Two men were travelling on a northbound train. Presently one of them began to break the ice, asked his fellow traveller:

"What's your line of business?"

"I, may sound strange," said the other, "but I'm a pepper traveller."

The first man threw out his hand. "Shake!" he said. "I'm a salt seller."

Suggests Debt Settlement

Sir Harry Armstrong Has Idea For Britain and United States

Sir Harry G. Armstrong, formerly Consul-General at New York, has written on the payment of the War debt problem and especially on the debt of Great Britain to the United States. He discusses what is expected by the United States, what is possible for Britain to do, and then he makes certain suggestions as a compromise or at least as a practical suggestion for settlement.

This comprises cutting the amount to about one-fourth its present nominal amount, or \$4,000,000,000 estimated debt to £200,000,000 to be paid in a single sum in sterling gold bonds bearing 3 1/2 per cent interest, which would be probably cast in Europe giving the gold to the United States at once. This simply amounts to putting Great Britain through the bankruptcy court and accepting about 22 cents on the dollar, which is usually considered a very good settlement. When it is considered, moreover, that it takes fully twice as much to buy British merchandise to pay a dollar today as when the debt was contracted, and that all securities and industrial investments have depreciated almost as much as a payment is a very fair one and the creditor is fully justified in making its acceptance.—Hamilton Herald.

Preventing Honey Spoilage

In helping to prevent honey spoilage, the division of bacteriology, Dominion department of agriculture, has evolved a method by which an examination of freshly extracted honey will indicate whether the honey may be expected to remain free from fermentation within one year.

It isn't the cost of getting men into office, but the upkeep that hurts.

Busy On New Theory

Einstein Pleased With Quiet Refuge On Norfolk Coast

Anybody attempting to molest Albert Einstein in his humble refuge on the Norfolk coast may get bullets from guns of his host's game keepers. And if Commander Oliver Lockyer Lampson himself is around, any intruder may have to face the revolver which the member of parliament respectfully is carrying while the celebrated mathematician is under his protection.

Professor Einstein arrived from London reported last night's threats against his life and set about at once in his quiet, tree-surrounded retreat to work on a new mathematical theory—the nature of which was not disclosed.

He said he was not responsible for the "Brown Book" which incited Hitlerite wrath and which, Nazis alleged, was a compilation of victims of persecution.

All I want is peace, and there could I find a more peaceful retreat than in England?" he asked a visitor.

Recipe for This Week

(by Betty Barclay)

CHEESE BISCUITS

1 cup sifted flour.

1 teaspoon combination baking powder.

1/2 teaspoon salt.

1 tablespoon butter or other shortening.

1/2 cup grated cheese.

3/4 cup milk or water.

Sift flour once, measure, add baking powder and salt, and sift again.

Cut in shortening and cheese. Add liquid gradually until soft dough is formed. Roll 1/4 inch thick on slightly floured board. Cut with small, round biscuit cutter. Bake in hot oven (450 degrees Fahrenheit) 15 minutes. Makes 12 biscuits.

CALIFORNIA PRUNE PIE

2 cups cooked prunes.

1 orange.

1/2 cup brown sugar.

1/4 teaspoon salt.

2 tablespoons butter.

1 cup liquid from prunes.

2 tablespoons cornstarch.

Baked pastry shell.

Meringue, flavored with few drops lemon extract (use 2 eggs whites).

Pit prunes and cut in half. Peel orange, removing white inner peel completely, and dice orange. Combine prunes, orange, sugar, salt, butter, prune liquid, and bring to a boil. Dissolve cornstarch in 2 tablespoons cold water, add to boiling mixture and cook until thick. Pour into baked pastry shell, cover with meringue and brown in a moderate oven (350 degrees Fahrenheit) for 15 minutes.

Cattle For Britain

A second shipment of beef cattle exported within a month to Great Britain by the Western Stock Growers' Association was shipped recently. The consignment totals 332, Alberta ranchers contributed 120 head and the remainder came from seven Saskatchewan ranches.

An average of 600 cabs are laid up for repairs in London at all times.

PRESIDENT OF CUBA

Dr. Roman Grau San Martin, University Professor, who will form new government.

Gathering Data On Meteors

Observers Will Check Progress During Byrd's Expedition To South Pole

One hundred and twenty sky observers, located at points all over the world, will check the progress of meteors during Commander Byrd's south pole expedition.

Byrd's chief astronomer, Prof. J. Pouter of Mount Pleasant, Ia., has made arrangements for these observation stations, which will form three progressive lines from the north to the south.

One string of stations will extend from Toronto, Canada, to the southern tip of South America. Another will be operated by the British Astronomical Association and will extend from Norway through Africa. The third will start at Tokyo, Japan, and extend through Australia.

The observers will gather data on the speed and direction of fall of the meteors. Professor Pouter will operate the southernmost station of Little America, he said.

Sheep Had Long Trek

Large Flock Driven Thirteen Hundred Miles In Australia

After passing through country generally considered impassable, Drover Jack Brady and eight helpers have just completed a drive of 7,500 sheep for 1,300 miles from Mackay to Snowtown, Australia. To water the animals in desert spots a pumping plant and troughing was carried. The trip required 20 weeks, and at night a guard against raids by wild dogs was necessary. Only 300 sheep died on the trip.

One Sign Of Prosperity

English People Buying Good Golf Balls And Bicycle Tires

Prosperity surely is on the way, declared Sir Eric Geddes, chairman of England's largest rubber manufacturing concern, at the annual meeting in London. "People are buying first grade golf balls," he said. Also they are buying bicycle tires again.

"These are quite useful barometers to show whether our people are feeling good or bad about their petty cash," he added.

C.W.N.A. Officers

Charles Clark, Of High River, Is Elected President

Charles Clark, of High River, Alta., was chosen president of the Canadian Weekly Newspapers' Association at the concluding session of the association's convention at Vancouver. Delegates wound up their business while on a boat trip from Vancouver to Powell River, B.C., 70 miles up the coast.

Directors include: Saskatchewan, David Dunbar, Estevan; Alberta, Scott, Whitehead; S. J. Dorman, Alameda; Andrew King, Rouleau; Cameron McIntosh, North Battleford; Sam Wynn, Yorkton.

Heavy Articles Stolen

Believe it or not, records of the British police department show the following ponderous articles have been stolen from their distracted owners in recent months. One front porch, a number of safes weighing half a ton and more; a cannon (from a public square); two granite blocks about four feet square; a brand new telephone pole; an automobile engine and two steel girders.

If sleep is conducive of beauty some people must suffer from chronic insomnia.

SUNDAY SCHOOL LESSON

SEPTEMBER 24

REVIEW—SOME EARLY LEADERS OF ISRAEL

Golden Text: "Be strong in the Lord, and in the strength of His might."—Ephesians 6:10.

Devotional Reading: Hebrews 11:22 to 12:2.

A Review By Means Of Allusions

"A man who has had the advantage of intellectual training cannot escape poverty of his wisdom when he barters his brains for a mass of potage."

When generous acts bloom from unselfish thoughts.

The Lord is with us, though we know it not.—Lucy Larcom.

Happy the heart that keeps its twilight hour.

And, in the depths of heavenly peace, Loves to commune with thoughts of tender power.

Thoughts that ascend, like angels, beautiful.

A shining Jacob's ladder of the mind.—Paul M. Hayne.

If I am only an instrument for gathering materials and another shall build the house, I trust my joy will be none the less.—William Carey.

There is waiting for you an inheritance—some promised Hebrew saint—into which I am invited by Christ. It is for you to say, "Give me this mountain!"

"O, give me Samuel's ear, The open ear of O Lord, Alive and quick to hear."

Each whisper of Thy Word!"

"Loldest born of Jesse's race, Wonder lights thy bashful face, While the prophets gifted old Seek thee for a path of life."

And his next son, for wealth, and wisdom famed.

The clouded ark of God, till then in tents Wandering, shall in a glorious temple dwell.—Milton.

You want to do about what you think it's God's will.

And you'll find out, that holds the rod, We want some more of Gideon's men.—Jesse.

For proclamations have not gret of edge.—Lowell.

Uses Novel Method

King Boris Gaudin Getting Better Roads For Bulgarians

King Boris of Bulgaria, ardent motorist, wants good roads for his realm and has found a novel way of getting them.

Every time he drives his car over a bad and bumpy stretch, he notes its exact location, and next day invites his minister of highways and communication to lunch or dine with him.

A royal invitation is equivalent to a command. Trembling, the minister obeys. After coffee and cigars, the king suggests a little ride into the country. The minister has to reply that he would be only too delighted and honored.

Once the bad patch of roadbed is reached, the monarch takes the wheel himself. Driving at first slowly, he gradually steps on the gas until he is hitting the seventies.

He takes care to see the minister is in the back seat, over one wheel. He never looks back to observe the anguished misfortunes of the minister. The drive is concluded, he turns around blandly and says, "You see, Your Excellency, our roads are not so bad, after all!"

The next day sees a sizeable working gang mending the offending highway.

C.W.N.A. Officers

Problem For British Banks

No Way To Stop Deposits From U.S. Citizens

A large volume of "unwanted" United States money being deposited in banks of the United Kingdom constitutes a problem that so far has defied solution, two prominent United States delegates to the British Commonwealth Relations Conference said at Toronto.

"The problem in England is very low now," Viscount Cecil of Chelwood, chairman of the United Kingdom group, said in an interview, "and one of our chief problems is the flood of unwanted money that is pouring into the banks. These funds, deposited in the main by United States investors, are subject to withdrawal at 24 hours notice and are of little or no value, though it has not been recovered yet how to get rid of them."

Their deposit appears to be actually by a desire on the part of the depositors to find the safest place possible for their money."

Viscount Cecil was confident England was on the road to economic recovery. He said a great deal of building plans are being put on foot by the country. Road construction was another feature of development prominent this year.

Expedition To South Pole

Rear Admiral Byrd On Quest Of New Territory For U.S.

With a crew of 70 scientists and adventurers, Rear Admiral Richard E. Byrd, is sailing on his second expedition to the Antarctic.

The aim of the expedition is twofold: To chart and claim for the United States any areas of ice recession along shores of South Pole, and to determine the extent of deposits of oil, coal and other natural resources.

The aviator and explorer announced his plans, arranged for the expedition, and the details of the expedition.

"We all feel that the steady recession of ice should have left some 500,000 square miles of land exposed at the South Pole, Byrd said—a trace of excitement in his voice as he talked of his new venture.

The bulk of this land, the explorer said, should be between the South Pole and South America—most of it lying along Evinyn Byrd Land, named for his mother—which was claimed for the United States on his expedition of three years ago.

Power Of Hypnotism

London Doctor Can Influence One Patient Over Telephone

How he hypnotizes a patient over the telephone was told by Dr. Hildred Cartliff, of London, during a lecture in Westminster Hospital. "This patient," he said, "has had to be hypnotized many times. The man has become so saturated with my dominance and so suggestible that I can suggest to him that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him."

If you are who you are, you will not lightly allow yourself to be the subjects of hypnotism. It is not worth it. It is a terrible business. Yet for his mother—which was claimed for the United States on his expedition of three years ago.

New Use For Radio

Installed As Means Of Communication On Russian State Farms

State and collective farms have grown so large in the U.S.S.R. that something had to be done about communication between various sections. The Institute of Electrification of Agriculture reports that it has installed radio receivers and transmitters on the tractors of one farm near Leningrad and solved the problem. The boys and girls now play merrily along and pass the time away chatting with one another "over a distance of many miles."

Old Clock Recovered

Made By Ticket-Of-Leave Mechanic And Had Long History

After a search of many years W. J. Cartwright, of Trenore, Australia, has recovered a clock with a long history. It was made by a ticket-of-leave mechanic in Macquarie's time and originally belonged to the pioneer Anglican clergyman, Rev. Robert Cartwright. Following the cleric's death in 1852 it was sold and taken to New Zealand, where the present owner found it.

Excellent grapes have caused an appreciable improvement in trade in Denmark.

Finland has ruled that employers must make domestic servants against accident.

BANKS SUBMIT CASE BEFORE THE COMMISSION

Ottawa, Ont.—Canadian chartered banks laid their case before the Royal Commission on Banking. As a climax to weeks of intense inquiry, five general managers of Canadian banking institutions presented a score of replies dealing with matters of vital importance to the financial life of the Dominion.

In a single day they dealt with 50 points which have been raised and emphasized before the commission from coast to coast. Swiftly they placed upon record their views on contentious matters.

First and foremost, the chartered banks came out definitely against creation of a central bank in the present extremely disturbed state of business.

"They stressed the danger of political influence. This danger would be present in ordinary times. But it was far more pressing now when years of unprecedented depression have brought dangerous currency theories into party politics and when it is quite within the bounds of possibility that some political party might gain office pledged to carry such theories into practice."

However strong might be the case for a central bank, "it would undoubtedly be better for this country to have none than to have a central bank subject in any way to political pressure," was the positive assertion.

Marshalling arguments for and against the proposed central institution, in a 30-page document, the chartered banks supplied an alternative proposal. They suggested the appointment of an independent board "composed of experts in finance and currency and broadly representative of the business and agricultural interests of Canada" to administer the functions now performed by the treasury board.

We believe that the administrative board would be helpful, that it would be a careful approach to the further development of this country's financial machinery, and that it would be inexpensive to operate, that it would not interfere with the ability of the chartered banks to serve the public adequately, and that, in the time, as it demonstrated its competence and efficiency, it might become an institution which perhaps some day might be entrusted, the banks submitted.

Conference Was Success

Treasury Officials Report Marked Progress At Three-Day Meeting

Ottawa, Ont.—Marked progress towards a common plan for presentation of public finance was made at the close of the three-day conference of Dominion and provincial treasury officials.

An official statement issued at the conclusion of the parley declared: "The purpose of the conference, it was emphasized, was not to produce changes in the form in which the public accounts of the provinces and their bodies are being presented, but each, which must follow individual requirements, but rather to achieve a scheme of reporting to the Bureau of Statistics as central clearing house whereby broad comparisons may be arrived at and a consistent purview obtained for the country as a whole."

"The discussions were of a practical and constructive nature throughout, and as a result the bureau will submit to the provinces at an early date a standard form of reporting which, it is expected, will achieve the objectives aimed at."

Ontario School Does Away With Homework

Oakville Collegiate Will Add Extra Hour To School Day

Oakville, Ont.—The virtual end of home work and detentions for high school students, with more work done in less actual studying time, will mark a new educational plan to be introduced into Oakville High School by Principal R. H. Archibald.

An hour will be added to the school day, but practically no home work will be called for from lower and middle classes, while upper school home work will be cut in half.

Northern Air Record

Edmonton, Alberta.—John Bythell, Canadian Airways pilot, has won the rich mining fields of Great Bear Lake in the far north to Edmonton in seven hours and 45 minutes, a new record for the 1,100 miles. The previous record was eight hours, 35 minutes, made last spring by Bythell.

Caring For Livestock

Alberta Announces Policy For Dried Out Areas In Province

Edmonton, Alta.—An announcement of the policy under which the province will deal with the livestock in the dried-out areas of the province will be cared for by the federal government, the livestock and the railways in the matter.

The policy covers not only the shipment of feed for necessary farm livestock into the areas concerned, but also the shipment of commercial cattle and sheep, and of farm work horses out of the areas to winter feeding quarters. Shipment of commercial cattle and sheep to winter feeding quarters will be undertaken on application from bona fide owners of such livestock, who shall certify that the stock are for winter feeding and that the ownership will be retained until such time as permission for sale in open market is given by the Department of Agriculture.

There will be no cost to the shipper for freight, the railways having granted 50 per cent. of the cost and the federal and provincial governments bearing equal weight between them the other 50 per cent.

Moved From Office

Senator Murdoch No Longer Vice-President of Railway Trainmen

Ottawa, Ont.—Senator James Murdoch was removed from the office of Canadian vice-president of the Brotherhood of Railway Trainmen by the executive board of the organization.

The removal, to take effect Sept. 15, came after President A. F. Whitcomb, of the brotherhood, had made nine charges against Murdoch for failure to perform his duties properly.

One of the charges was contained in the allegation that Senator Murdoch "failed in his duties as an officer" of the brotherhood.

The removal, to take effect Sept. 15, came after President A. F. Whitcomb, of the brotherhood, had made nine charges against Murdoch for failure to perform his duties properly.

Choice Cattle For Churchill Shipment

Twenty Carloads To Go From Saskatoon, Ont. And Alberta

Calgary, Alberta.—Several carloads of cattle from Calgary and other Alberta districts, will be included in the shipment to leave Churchill, Manitoba's northern seaport, for the United Kingdom, September 27, aboard S.S. Brandon.

Jack Byers, manager of the Western Stock Growers' Association, is handling the shipment of 200 head of prime cattle and 200 head of calves from this area.

It was pointed out by Alberta cattlemen they had urged a total shipment of beef cattle to be sent through Churchill earlier in the season, the proposal supported by various organizations, but that had not been possible.

Costs of shipping via Churchill will be comparable with those of the Old Country. The Dominion route, it is added, Twenty carloads are expected to be taken from Saskatchewan and Alberta with choice steers, weighing 1,300 to 1,200 pounds, receiving preference so the consignment will be well received in the Old Country.

Wins Fortune

Montreal Man Wins Large Sum In Sweepstakes Ticket

Montreal, Que.—Adrien Vanier, 69-year-old shoe store manager reported to have won \$54,000 on a sweepstakes ticket in the St. Lager class, stepped into court and drew out a summons against his wife on a charge of participating in a lottery. Mr. Vanier is scheduled to appear in court this week.

Vanier took action against his wife under section 226 of the criminal code, which provides that money obtained through illegal sweepstakes "is liable to be forfeited to any person who sues for the same by action or information in any court of competent jurisdiction."

The winning ticket was held in Vanier's name but, it is presumed, on the basis of his action, that it has been transferred to his wife. As informant he will be entitled to retain earnings of the ticket.

Two Canadians and one American reaped small fortunes as a result of the winning of the St. Lager stakes at Doncaster, England.

Besides Adrien Vanier, 64, of Montreal, a ticket on Falculation, the second horse, is held by A. Labelle of Quebec City, who receives \$25,000. William A. Hase, Calumet City, Ill., has a ticket on Scourge Tiger, in third position. Hase wins \$15,000.

Besides Adrien Vanier, 64, of Montreal, a ticket on Falculation, the second horse, is held by A. Labelle of Quebec City, who receives \$25,000. William A. Hase, Calumet City, Ill., has a ticket on Scourge Tiger, in third position. Hase wins \$15,000.

MOLLISONS WILL TRY ANOTHER DISTANCE FLIGHT

Montreal, Que.—A young man who has scanned the widening horizons from Crofton to the Cape and all along the world's skyway came into Montreal on the way to the start of his spectacular adventure. And in the manner of a conqueror, the exploit will be shared by his wife.

By the end of this month, barring the unforeseen, Jim and Amy Mollison, who are on their "Seafarer II," will be driving eastward from Canada to beat the non-stop distance record of the air.

Quiet, casual, and the ideal of the ship, Jim arrived on the "Empress of Britain" at Quebec, halted for a bit in Montreal, and planned to join Amy in Toronto. Together they will make the preparations for the attempt to beat the mileage of the French flyers, Colson and Lacombe.

The packed sands of Wasaga Beach, near Collingwood, Ont., will in all probability be the take-off spot. A definite decision was still to be made, and Jim says it's up to Amy, who knows the ground.

"We'll get away just as soon as possible after the equinoctial gales are over," the 28-year-old flyer said. "How far are we going? As far as we can."

It is probable this will be the last spectacular flight of this nature undertaken by the Mollisons. Jim said as much. "I wish to see the world, including three across the Atlantic. That should be enough. And Amy, I think, would rather than share of danger. I don't think we'll try anything on this scale again."

MOTOR OWNERS PAY HUGE TAX TO OPERATE CARS

Ottawa, Ont.—Motor vehicles operated in Canada rank their owners into a tax bill of \$56,700,000 last year, according to an estimate released by the Dominion Bureau of Statistics. That meant over \$50 for every registered motor vehicle as tax on nothing of the kind.

The provinces collected \$2,126,271 for registration fees on vehicles and operators, and another \$7,083,316 in gasoline taxes. The Dominion took \$4,508,471 on import duties and excise taxes. In addition there was a registration of \$6,004 motor vehicles in gasoline taxes. The Dominion took \$4,508,471 on import duties and excise taxes. Each parcel will be offered for sale subject to a reserve bid,
and subject to the reservations contained in the existing certifi-
cates of title. Terms, cash.

Redemption may be effected at any time prior to the sale,
by the payment of all arrears and costs.

Dated at Champion, Alberta, this 24th day of August, 1933.

HERBERT COOPER,
Secretary-Treasurer.

Local & General

Stock up on Lard at the
Special Price offered this week
at the Meat Market.

Removal of the minimum
price of wheat in the Winnipeg
market has resulted in greater
export activity.

Mrs. Will Rogers won the prize for
the best cake at the State Fair. See
how he did it. This wonderful show
is coming to your theatre, Friday
night Sept. 20th.

Mr. and Mrs. Ayotte of Long
Beach, California, are visitors
in this district. While here
they will reside in the residence
owned by Mrs. Therriault.

Mr. and Mrs. G. Smithson,
who have been visiting rela-
tives in the district for the
past month, left for their home
in California Saturday.

Leonard Goodnight was op-
erated on in the Vulcan hospi-
tal on Sunday for appendi-
citis. His condition is very
favorable.

Miss Rachel Crane, who has
been visiting at the home of
her father, Mr. R. Crane, left
for Calgary Monday where she
will attend school.

Neil Johnson, was operated
on for appendicitis this week in
the Vulcan hospital and is re-
ported to be making satis-
factory progress.

A large number of young
people from town and vicinity
attended the dance held in Mc-
Lean's barn at Nobleford on
Friday last. A good time was
reported.

Mrs. Pugeley of Missoula,
Montana, sister of Dr. E. H.
Freese, arrived in Champion
this week and expects to spend
the next three months visiting
at the home of her brother.

Don't forget the dance to be
held on Friday night, October
13, under the auspices of the
Elks with Hopkins' Old Time
Orchestra of Calgary in at-
tendance.

Clayton Crane, who has spent
the past two months at his
father's farm here, expects to
leave Thursday to resume his
studies at the university in
Salt Lake City.

General appreciation of the
picture show on Wednesday
night was in evidence. These
shows are growing rapidly in
popularity, the sound effect
being exceptional.

Mr. Guy Locke of Calgary,
who specializes in permanent
waving, is paying a visit to
Champion in the near future.
For further information see
Mrs. Clara Ashmore.

Seeded in the garden of Mrs.
W. Urieh, a musk melon vine
produced a fully ripened melon.
It was quite large and a very
good specimen. Mrs. Urieh
says, that in flavor, it was as
delicious as any she had ever
tasted.

K. R. McLean, R.O., of McLean
& Anderson, Sight Specialist of
234-8th Ave West, Calgary, will
make his monthly visit to
Champion, Friday, Sept. 20th
at the Drug Store.

As a result of a meeting held
on Monday evening, it was de-
cided to hold a convention in
Vulcan on Friday, November
10, for teachers in Inspector
Krispa's district. All teachers
in this inspectorate are re-
quested to attend.

Dr. Haal will be in Champion
on Thursday and Friday only
of each week starting October
1. Office in old bank building
in Vulcan Saturday, Monday
Tuesday and Wednesday. Office
in Carson Block.

The shooting season got
away to a good start on Fri-
day with plenty of hunters re-
porting full bags. Numerous
coveys of partridge numbering
from five to twenty birds, are
in evidence. There are a few
ducks on the rivers. No reports
of duck disease have been
heard of in this district up to
date.

Miss Elsie McLean was suc-
cessful in passing her recent
supplementary examinations,
thus obtaining a first class cer-
tificate. Elsie won distinction
in her June examinations when
she received honor marks in
three subjects namely, Algebra
81, Geometry 88 and Trigonometry
90. Good marks were obtained
in the other units written.

An auction Sale will be held
on the premises of Otto Hagge's
7 1/2 miles west of Champion on
Wednesday, Oct. 4th. Art.
Hopkins will be the auctioneer.
